

## PROFESSIONAL RESUME AND PROJECT PORTFOLIO

# DINDI NARENDRA KUMAR MADALA

ENTREPRENEUR / TECHNOLOGY PROFESSIONAL / SYSTEM BUILDER

+91 85208 46598 | [ceo@bdits.in](mailto:ceo@bdits.in)  
[github.com/mdanwarcrm/portfolio](https://github.com/mdanwarcrm/portfolio)

## PROFESSIONAL PROFILE

India-based entrepreneur and technology professional with experience spanning family transport operations, network engineering, security analysis, and digital product development. Worked across United Kingdom client environments from 2018 to 2022 and has focused on India-based entrepreneurship since January 2023. Builds practical systems around real operational needs across CRM, education, finance, billing, retail, commerce, automation, and analytics.

## PROFESSIONAL EXPERIENCE

## Entrepreneur - Digital Products and Business Platforms

JAN 2023 - PRESENT | INDIA

Developing technology-driven business solutions across overseas education, CRM, finance, billing, retail, and e-commerce.

- Translate operational requirements into structured product workflows and interfaces.
- Lead product strategy, workflow design, automation thinking, and practical delivery across six featured platforms and nine applied labs.

## Network Engineer and Security Analyst

FEB 2018 - FEB 2022 | UNITED KINGDOM

Supported network infrastructure and security operations across multiple UK client environments.

- Worked across Silver Chip, Motor Fuel Group, BP, Londis, Monzo Bank, and Salford Shopping Centre environments.
- Focused on monitoring, infrastructure support, troubleshooting, risk awareness, technical investigation, and service reliability.

## Business Operations - Family Transport Business

2014 - 2018 | INDIA

Built an operational foundation through hands-on involvement with logistics, lorries, JCBs, and heavy-vehicle activity.

- Supported coordination, maintenance awareness, day-to-day problem solving, and responsibility in real operating conditions.

## CORE EXPERTISE

- Entrepreneurship and product strategy
- Network engineering and operations
- Cyber security analysis
- CRM and workflow systems
- Web applications and dashboards
- AI-assisted automation
- Business operations

## EDUCATION

**B.Tech**

Information Technology

**Intermediate - MPC**

Mathematics, Physics, Chemistry

**Secondary Education**

10th Class

## UK CLIENT ENVIRONMENTS

Silver Chip / Motor Fuel Group / BP / Londis /  
Monzo Bank / Salford Shopping Centre

SELECTED WORK

# Featured product portfolio

Six platform concepts and active builds shaped around real business workflows. Status labels describe the portfolio state shown on the website.

|    |                                                                                                                                                                                                                                                                                                                                                                  |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01 | <div><b>Nidhi Path</b> <span>ACTIVE</span></div> <div>Product and Systems   Next.js / Supabase / TypeScript / Operations</div> <div>A role-aware loan operations platform that unifies lead, case, document, and communication workflows. <b>Contribution:</b> Product strategy, operations modelling, interface direction, and implementation.</div>            |

| 05 | <div><b>Coffee Shop CRM and Billing</b> <span>PROTOTYPE</span></div> <div>Operations System   POS / CRM / Inventory / Analytics</div> <div>A compact system combining billing, customer history, loyalty, stock visibility, and daily performance. <b>Contribution:</b> POS workflows, customer model, reporting logic, and product design.</div>                |
| 06 | <div><b>E-Commerce Platform</b> <span>CONCEPT</span></div> <div>Commerce Platform   Commerce / Next.js / Payments / Analytics</div> <div>A modular storefront and operations dashboard focused on discovery, checkout, fulfilment, and customer insight. <b>Contribution:</b> Commerce flows, design system, catalogue structure, and dashboard direction.</div> |

PORTFOLIO SCOPE

These projects demonstrate product thinking across finance operations, overseas education, hospitality, retail, and digital commerce. They are presented with transparent portfolio status labels rather than unsupported commercial outcome claims.

APPLIED EXPERIMENTATION

# Technology labs and capabilities

Nine focused labs extend the product portfolio into AI, automation, infrastructure monitoring, security operations, and business systems.

**07 AI Document Intelligence LAB**

Extract, summarize, search, and question complex documents.  
PDF upload / Semantic search / Q&A; / Structured extraction

**08 ATS Resume Analyzer LAB**

Evaluate ATS compatibility, keywords, structure, and role alignment.  
ATS scoring / Keyword matching / Section analysis / Recommendations

**09 University Course Discovery CONCEPT**

Research courses, fees, requirements, and verified official sources.  
Course search / Official links / Fee tracking / Comparison

**10 AI Customer Support Desk LAB**

Organize customer questions with assisted replies and escalation workflows.  
Support inbox / AI suggestions / Knowledge base / Analytics

**11 Smart Lead Assignment Engine LAB**

Balance and route CRM leads through automated and manual assignment.  
Round robin / Bulk import / Assignment history / Workload balance

**12 Fleet Operations Dashboard CONCEPT**

Coordinate vehicle records, maintenance, costs, reminders, and status.  
Vehicle records / Fuel logs / Maintenance / Fleet analytics

**13 Network Operations Monitor LAB**

Visualize infrastructure health, device activity, uptime, and incidents.  
Device inventory / Uptime / Topology / Alerts

**14 Cyber Security Incident Dashboard LAB**

Track simulated security events from severity through response.  
Event queue / Severity / Timeline / Response status

**15 Business Operations CRM CONCEPT**

Unify customers, enquiries, follow-ups, tasks, notes, and reporting.  
Customers / Tasks / Activity history / Reports

CAPABILITIES AND TECHNOLOGIES

**BUSINESS**

Entrepreneurship / operations / product strategy / requirements / process design / digital transformation

**CYBER SECURITY**

Security analysis / monitoring / risk awareness / investigation / incident review / infrastructure security

**TECHNOLOGIES**

React / Next.js / TypeScript / Tailwind CSS / Node.js / Supabase / Python / PostgreSQL / REST APIs / GitHub

**NETWORKS**

Engineering / operations / infrastructure support / troubleshooting / connectivity / reliability

**SOFTWARE**

Web applications / CRM / billing / e-commerce / dashboards / workflow automation

**AI AND AUTOMATION**

AI workflows / LLM integration / prompt engineering / document processing / AI-assisted CRM
